

CHECK SHEET

Manage and comply all your assets; from vehicles, machinery, equipment, stock anything you can think of. Use the technology you already have to keep your assets safe and compliant and get your users to help you manage their maintenance.

An easy to use check sheet to keep your fleet safe

Features

- Mobile App (Android & iOS).
- Run multiple Check Sheets fully customised to your operation.
- Users take responsibility to check vital maintenance & safety aspects, ensuring you get the info you need to keep your fleet and assets safe and compliant.
- Scan barcode QR code or numberplate to undertake check & ensure checks are undertaken physically with the asset.
- Get notified only when things need attention, notifications are sent only when an area has failed the check sheet so you can react.
- The onus is on the Drivers to take responsibility for their safety.
- Take a photo of any issues, add notes and submit a signature on screen.
- Easily create or modify your own in-depth customised check sheets from the Argus Hub.
- Check sheets feature categories, questions & descriptions for in-depth detail & organisation.
- Reports are securely stored in un-editable PDF.
- Notify the correct person within your organisation.
- Filter the check sheet portal by different aspects, eg date, driver
- Immediately see the pass/fail status of each check.
