

# Do you understand your FBT risk?

Fringe benefit tax (FBT) is a tax you pay on most non-cash benefits you provide to your employees. Without Argus Tracking, managing FBT on your fleet vehicles can be mindboggling & prone to costly errors. Use Argus Tracking to make managing your FBT easy.

Visualise your FBT and save time, money and hassle.

## How do I know if my fleet is an FBT risk?

**Do you have vehicles being used when they shouldn't be? Or vehicles driven for personal use or after hours?**

You will likely be liable for FBT, and this is a costly risk.

## How do I know if I'm overpaying FBT?

**Are you paying the maximum amount for FBT?**

If this is the case right now, you will be paying too much on FBT.

**Are you managing areas where FBT may not be payable?**

If your vehicles are away from home for 24 hours (for instance parked at an airport), then you may not need to pay FBT for these days of use.

**Our company vehicles are not available for private use, do I still need to pay FBT?**

No, FBT is only paid when a vehicle is made available for private use, let us help you prove this.

## How do I work out how much FBT I need to pay?

**Easy – we can show you how!**

Get in touch today and let Argus reduce your FBT risk & costs

## Benefits

- Understand your FBT spend.
- Don't over pay your FBT – pay for only what you need to.
- Identify your highest FBT risk drivers.
- Save time and money.
